**INTRO**

Whenever possible, the fullest expression of the logo lock-up (top left) should be used. For more constrained applications (i.e. social media, ad references) the secondary logomark of the “DON’T BE THE ONE” lock-up may be used.
As a standard rule, use the “E” in “ONE”, from the logo, as a guide for minimum padding around logo. Legibility and consistent replication of the logo requires space to breathe. Although this as the minimum padding required, more space is always preferred.
The brand color-system consists of two primary colors: BLUE & WHITE and the secondary color: GREEN. Only when the logo may be set against white, should full colors be used. If that is not possible, the knockout logo on this page is used over WSO BLUE.

DARK COLORS
Here are several examples of what NOT to do when handling the logo:

- Do not stray from approved color combinations.
- Do not shrink or stretch the logo.
- Do not place the logo over a gradient.
- Do not change the orientation of the logo with type.
“Titling Gothic FB Com” and “Helvetica Neue” are the fonts of choice. Within the “Helvetica Neue” font family, the weights of: Bold, Medium, and Light are used. As a general rule, the tracking remains zero and the leading should match the font size.
Don’t Be The One

When it comes to stroke, don’t be the one.

One of us will struggle to say “I love you” again. One in four of us will have a stroke in our lifetime, which can cause speech difficulties. However, most strokes are easily prevented with simple steps. When it comes to stroke, #DontBeTheOne.
The color palette is a reflection of the World Stroke Organization's colors. The blue or green should always be present as dominant colors, with tertiary as an accent. Tints of the colors are acceptable for legibility purposes.
PHOTOGRAPHY  01

STYLE

The use of photography justifies the statistic that one in four people will have a stroke. Within the ads and social posts, people of varying ages are seen doing everyday activities and one of the photos shows someone who has had a stroke in a similar setting. The topic and layout of the photography will remain consistent within each collection (i.e. eating, transportation, spending time with loved ones).
PHOTOGRAPHY 02
ALIGNMENT

The use of photography justifies the statistic that one in four people will have a stroke. The topic and layout of photography will remain consistent within each collection of photos (i.e. eating, transportation, spending time with loved ones). The photos will live in four even windows, vertically stacked or in a quadrant.
PHOTOGRAPHY  03

IN CONTEXT

Here is an example of photography as it may appear in a poster ad. Choose images that match the headline topic and align correctly.
PHOTOGRAPHY 04
DON’T(S)

Here are several examples of what NOT to do when handling photography.

- Do not place text or logo over an image.
- Do not use any photo-treatments.
- Do not mix photography subjects.
ASSETS 02

SOCIAL POSTS

Instagram assets should follow either the strip or quadrant format, using images from the library and following the alignment systems outlined in the print ads.
All social channels should use the Don’t Be The One profile picture overlay and cover photos structure.
WE ARE

1. Using urgency to highlight that everyone is at risk of a stroke.
2. Informative but our language is not overly scientific.
3. Empowering people to recognize that they can make changes to lessen their risk.

WE AREN’T

1. Trying to make people feel hopeless.
2. Shaming people for unhealthy lifestyles.
3. Using hyperbole and sensationalism to communicate our message.

MESSAGING 01 PERSONALITY

Knowing what we are is just as important as knowing what we are not. Here we illustrate the personality and tone ALL of our communications will adhere to. This will ensure consistent messaging across various mediums, platforms and cultures.
MESSAGING 02

AUDIENCE

We are speaking to people of various nationalities, races, ages and levels of education – this means that we need to use simple and straightforward language.

Always remember: everyone wants to feel hopeful about the future, make sure your messaging delivers on this premise.
MESSAGING HIERARCHY

1. STROKES AFFECTS US ALL
   Strokes can happen to anyone, anywhere, anytime. Thinking that it won’t happen to you won’t reduce your risk.

2. KNOW YOUR RISK
   A stroke can happen to anyone, but there are risk factors that increase your chances. It’s important to understand your risk and the steps you can take to reduce it.

3. DON’T BE THE ONE
   One in four of us will have a stroke in our lifetime, but most can be prevented. When it comes to stroke, Don’t Be the One.
